

# Landscape Architecture

The PS&S Landscape Architectural staff draws its strength from a **diverse, experienced, and collaborative** framework. For over 35 years our Landscape Architects have been successfully delivering inspired projects which exceed client expectation while skillfully negotiating the regulatory process. PS&S has forged an approach to Landscape Architectural projects in the public and private realm that integrates the latest trends in placemaking tempered with real-world technical, economic, and delivery driven solutions.

## PS&S Landscape Architects are...

- 1 Diversified.** From residential estate planning to corporate headquarters, public and private sector clients, green-roofs to large scale municipal parks our dedicated team of professionals has the broad based diversified portfolio to deliver any project type.
- 2 Experienced.** Our award-winning staff of Landscape Architects brings a seasoned, well-crafted, methodology to every project. This level of real-world practical understanding leads to successful project delivery. Sustainable and maintainable designs are imperative to our professional integrity.
- 3 Collaborative.** Our Landscape Architects provide the fulcrum in a delicate balance between land and building. Our unique ability to speak the common language between owner, architect, engineer and contractor ensures the successful completion of every project.

# Creating Memorable Spaces that...

## Inspire

By embracing the true spirit of place we are able to create an appropriate response that is meaningful, structured, organized and elegant.

## Play

Providing design of facilities that engage human interaction, competition and socialization such as playgrounds, municipal parks, stadiums, and athletic facilities.

## Perform

In-depth analysis of the site, respect for economic considerations, keen attention to clients' needs and integration of the latest technologies offered are the foundation of PS&S's innovative designs.

## Add value

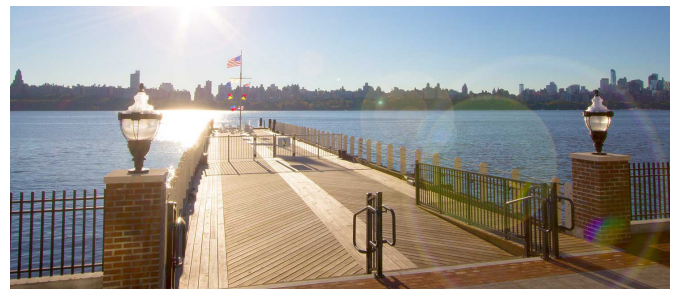

The fundamental basis of our design strategy is to understand the ecology of a site and maximize its potential opportunities while eliminating or minimizing its constraints.

## Shape minds

Quality exterior spaces have a direct effect on well-being of students and professionals alike. PS&S masterfully create spaces that engage the senses and provide a backdrop for learning.
