

Stormwater Compliance in New Jersey

Stormwater compliance includes a myriad of regulations that can be daunting and if not done correctly, expensive. Stormwater is a significant source of pollutants entering the waters of New Jersey. Pollutants carried by stormwater potentially impact drinking water supplies, impair fisheries, and diminish waters for recreation. PS&S can help you turn stormwater facilities into project amenities, wade through the regulations, ensure compliance, and while protecting the environment for future generations.

Stormwater Basics:

- 1 New Jersey regulates Stormwater Management through administrative code 7:8
- 2 Water Quality (TSS Removal)
- 3 Stormwater Recharge
- 4 Stormwater Quantity Attenuation

Related Services:

- Stormwater Management
- NJ Regulatory Compliance
- Soil Erosion & Sediment Control
- Surveying & Mapping
- Non-Point Source Pollution Prevention
- Facility Inspection
- Floodplain Management

For more information on Stormwater Compliance and other PS&S Stormwater services, please contact **William Salmon, P.E., CFM** at wsalmon@psands.com or **732-430-7201**

Let us help you protect your site from adverse stormwater impacts

- Comprehensive Stormwater Management
- Soil Erosion and Sediment Control Plans
- Stormwater Pollution Prevention Plans (SWPPP)
- Operations and Maintenance Manuals
- Extensive knowledge of the growing NJDEP regulations
- Licensed Professionals and Certified Floodplain Managers

Stormwater Management Standards:

- Water Quality, Recharge, and Attenuation
- NJDEP Best Management Practices (BMP's)
- Non-structural strategies and low impact techniques
- *Green Infrastructure* will be a mandatory stormwater design component under NJDEP proposed Stormwater Management Amendments

Experience with the following Stormwater Management Measures:

- Bioretention Systems
- Standard Constructed Wetlands
- Dry Wells
- Extended Detention Basins
- Infiltration Basins
- Manufactured Treatment Devices
- Blue Roofs
- Sand Filters
- Vegetative Filter Strips
- Wet Ponds
- Grass Swales
- Subsurface Gravel Wetlands
- Green Roofs
- Cisterns
